

Symantec™ Mail Security for Microsoft® Exchange

Superior protection with unparalleled performance for Microsoft Exchange Server environments

Data Sheet: Messaging Security

Overview

Symantec Mail Security for Microsoft Exchange combines Symantec anti-malware technology with advanced heuristics to provide real-time email protection against viruses, spyware, phishing, and other malicious attacks while enforcing content filtering policies on Microsoft Exchange Server 2007, 2010, 2013, and 2016. In addition, Mail Security leverages Symantec Premium AntiSpam, powered by Brightmail™ Technology, to stop 99 percent of incoming spam with less than one in 1 million false positives. It supports Hosted, Microsoft Hyper-V®, or VMware® virtualized Exchange server environments. Symantec Mail Security for Microsoft Exchange complements other layers of protection by preventing the spread of email-borne threats and enforcing data loss prevention policies.

New Feature(s)

- Support for Microsoft Exchange 2016

Key Benefits

Superior Protection

- Upgraded antispam and antimalware components leveraging Symantec latest protection techniques
- Ability to scan messages in transit or on the mailbox to protect against email borne threats
- Powered by Premium AntiSpam, stopping 99 percent of spam with less than one in 1 million false positives
- Rapid release definitions and advanced heuristic technologies provide immediate protection
- Advanced content filtering protects sensitive information using pre-defined policies, regular expressions, attachment criteria, true file typing, and more. Microsoft Active Directory® based enforcement simplifies policy management

Flexible and Easy to Use Management

- Initial setup can be completed within 10 minutes with no requirements for tuning, allow listing, or block listing
- Management console provides remote installation, centralized server group policy configuration, notifications, alerts, and schedulable consolidated reporting
- Support for Microsoft Exchange Database Availability Group, along with Microsoft and Veritas® Cluster Server in Exchange 2007, minimizes downtime and simplifies maintenance
- Integration with Microsoft Systems Center Operations Manager enables end-to-end monitoring of your IT environment

Optimized for Exchange

- Flexible, real-time, scheduled, and manual scanning provides efficient protection
- In-memory scanning and effective multi-threading provides superior performance
- Edge and hub focused scanning leverages anti-virus stamping to eliminate redundant scanning and minimize impact to mail store
- Supports Microsoft Exchange 2007, 2010, 2013, 2016, Microsoft Hosted Exchange, 64-bit Windows, VMware®, and Microsoft Hyper-V® Virtualized environments

System Requirements

Server Operating Systems

- Microsoft Windows Server® 2012
- Microsoft Windows Server® 2012 R2
- Microsoft Windows Server® 2008 R2/SP2 Standard/Enterprise (64-bit)

Exchange Platforms

- Microsoft Exchange Server® 2016 (64-bit)
- Microsoft Exchange Server® 2013 (64-bit)
- Microsoft Exchange Server® 2010 (64-bit)
- Microsoft Exchange Server® 2007 (64-bit)

Management Console Operating Systems

- Windows® 8 (32-bit or 64-bit)
- Windows® 7 (32-bit or 64-bit)
- Microsoft Windows Server 2012
- Microsoft Windows Server 2012 R2
- Microsoft Windows Server 2008 R2/SP2 Standard/Enterprise (32-bit or 64-bit)

Hardware

- Hardware based on the exchange requirement, 1GB available disk space

Hardware Virtualization

- VMware® vSphere ESX and ESXi
- Microsoft Hyper-V®
- Windows Server 2008 or 2012 with Hyper-V technology
